

Additional devices

Attractive product.

Additional devices at the car wash increase its attractiveness, which attracts additional customers.

Flexibility in configuration.

Possibility to select device models and parameters to suit your needs.

Stainless steel housing.

Great aesthetics, high strength and corrosion resistance.

Personalization of the appearance of devices.

Complete freedom in choosing colors and stickers.

Remote management system.

Possibility to connect each device via the Internet to the Carwash Manager system, facilitating the management of the entire car wash.

BKF additional devices will help increase the **attractiveness of your car wash.**

Additional devices

Vaccum cleaners

Self-service stationary devices for cleaning vehicle interiors. Made of stainless steel, equipped with strong industrial or professional turbines and large waste tanks, they guarantee long-lasting and efficient operation and full user satisfaction.

- Wide configuration possibilities (single- and double-station devices, optional wheel or air compressor), wide range of available payments.
- Possibility of connecting to the Carwash Manager application, which allows you to receive notifications about the device status (e-mail, text messages, smartphone notifications) and access to statistical and financial data (Internet required).

Money changers

The basic function of the change machine is to exchange banknotes for coins and tokens to pay for washing. It is possible to extend its usefulness thanks to many additional options, such as the sale and top-up of loyalty cards and payments using payment cards (using the change machine as a payment point for the entire car wash).

- Resistance to attacks using an electromagnetic pulse generator.
- Possibility to connect to the Carwash Manager application.

Washer fluid distributor

A great addition to the offer at every car wash. Proven technological solutions, stainless steel housing and a large, 220-liter liquid tank. The electronic flow meter precisely measures the fluid, showing the current amount to be used on the display.

- A dedicated installation extends the pump's life and eliminates factors that cause uncontrolled pressure increases.
- Possibility to connect to the Carwash Manager application.
