

“Our people make it bright”

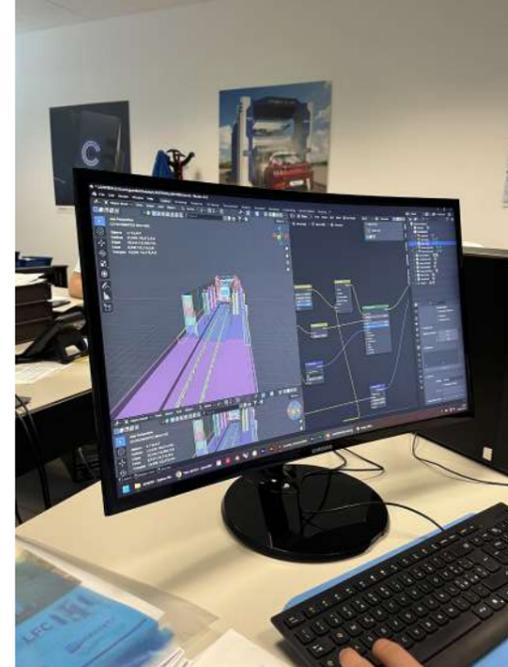

TEAM CECCATO

“Our people
make it bright.”

Behind every Ceccato system, there's a team of passionate and skilled people, some of whom have been with us for over 30 years. We develop and produce vehicle washing solutions with care, precision, and pride, rigorously Made in Italy.

Behind every project, there's a close-knit team of people who, with different roles and a common vision, work together with passion to deliver high-quality results. We build reliable systems to serve every customer, anywhere in the world. The combination of experience, know-how, and passion makes Ceccato the ideal partner for those seeking excellence in vehicle washing.

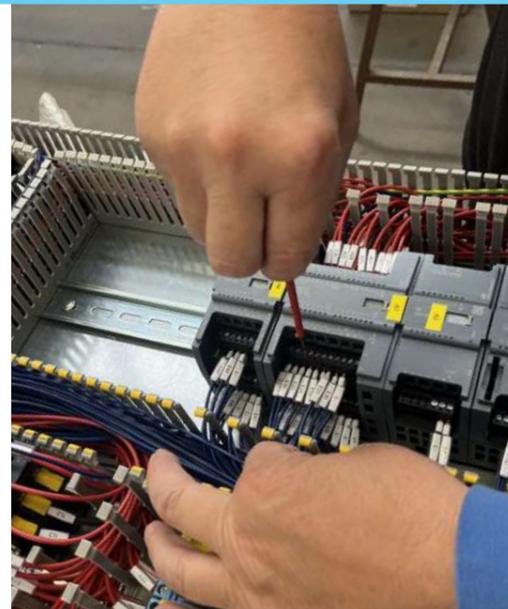

ENGINEERING & DESIGN

In our technical offices, engineers and designers work side by side to forge efficient, intuitive, and sustainable systems. Every detail is carefully designed to combine aesthetics, performance, and functionality.

PRODUCTION: QUALITY FIRST

We manufacture the main components of our systems in-house at our facility. From metalwork to electrical and hydraulic parts, everything is crafted by skilled hands using top-quality materials. This ensures maximum control at every stage of the production process.

TESTING: CERTIFIED QUALITY

We verify the proper functioning of every component, test all features, and simulate real operating conditions. Testing is our final step, but it's our first commitment to the customer.

MADE IN ITALY

Ceccato's washing systems are born in Italy, crafted by those who know the value of doing things right.

From production to testing, every step is carried out at our facility, under the watchful eyes of skilled people. Hands that screw, assemble, connect. But above all, hands that understand the responsibility of every detail.

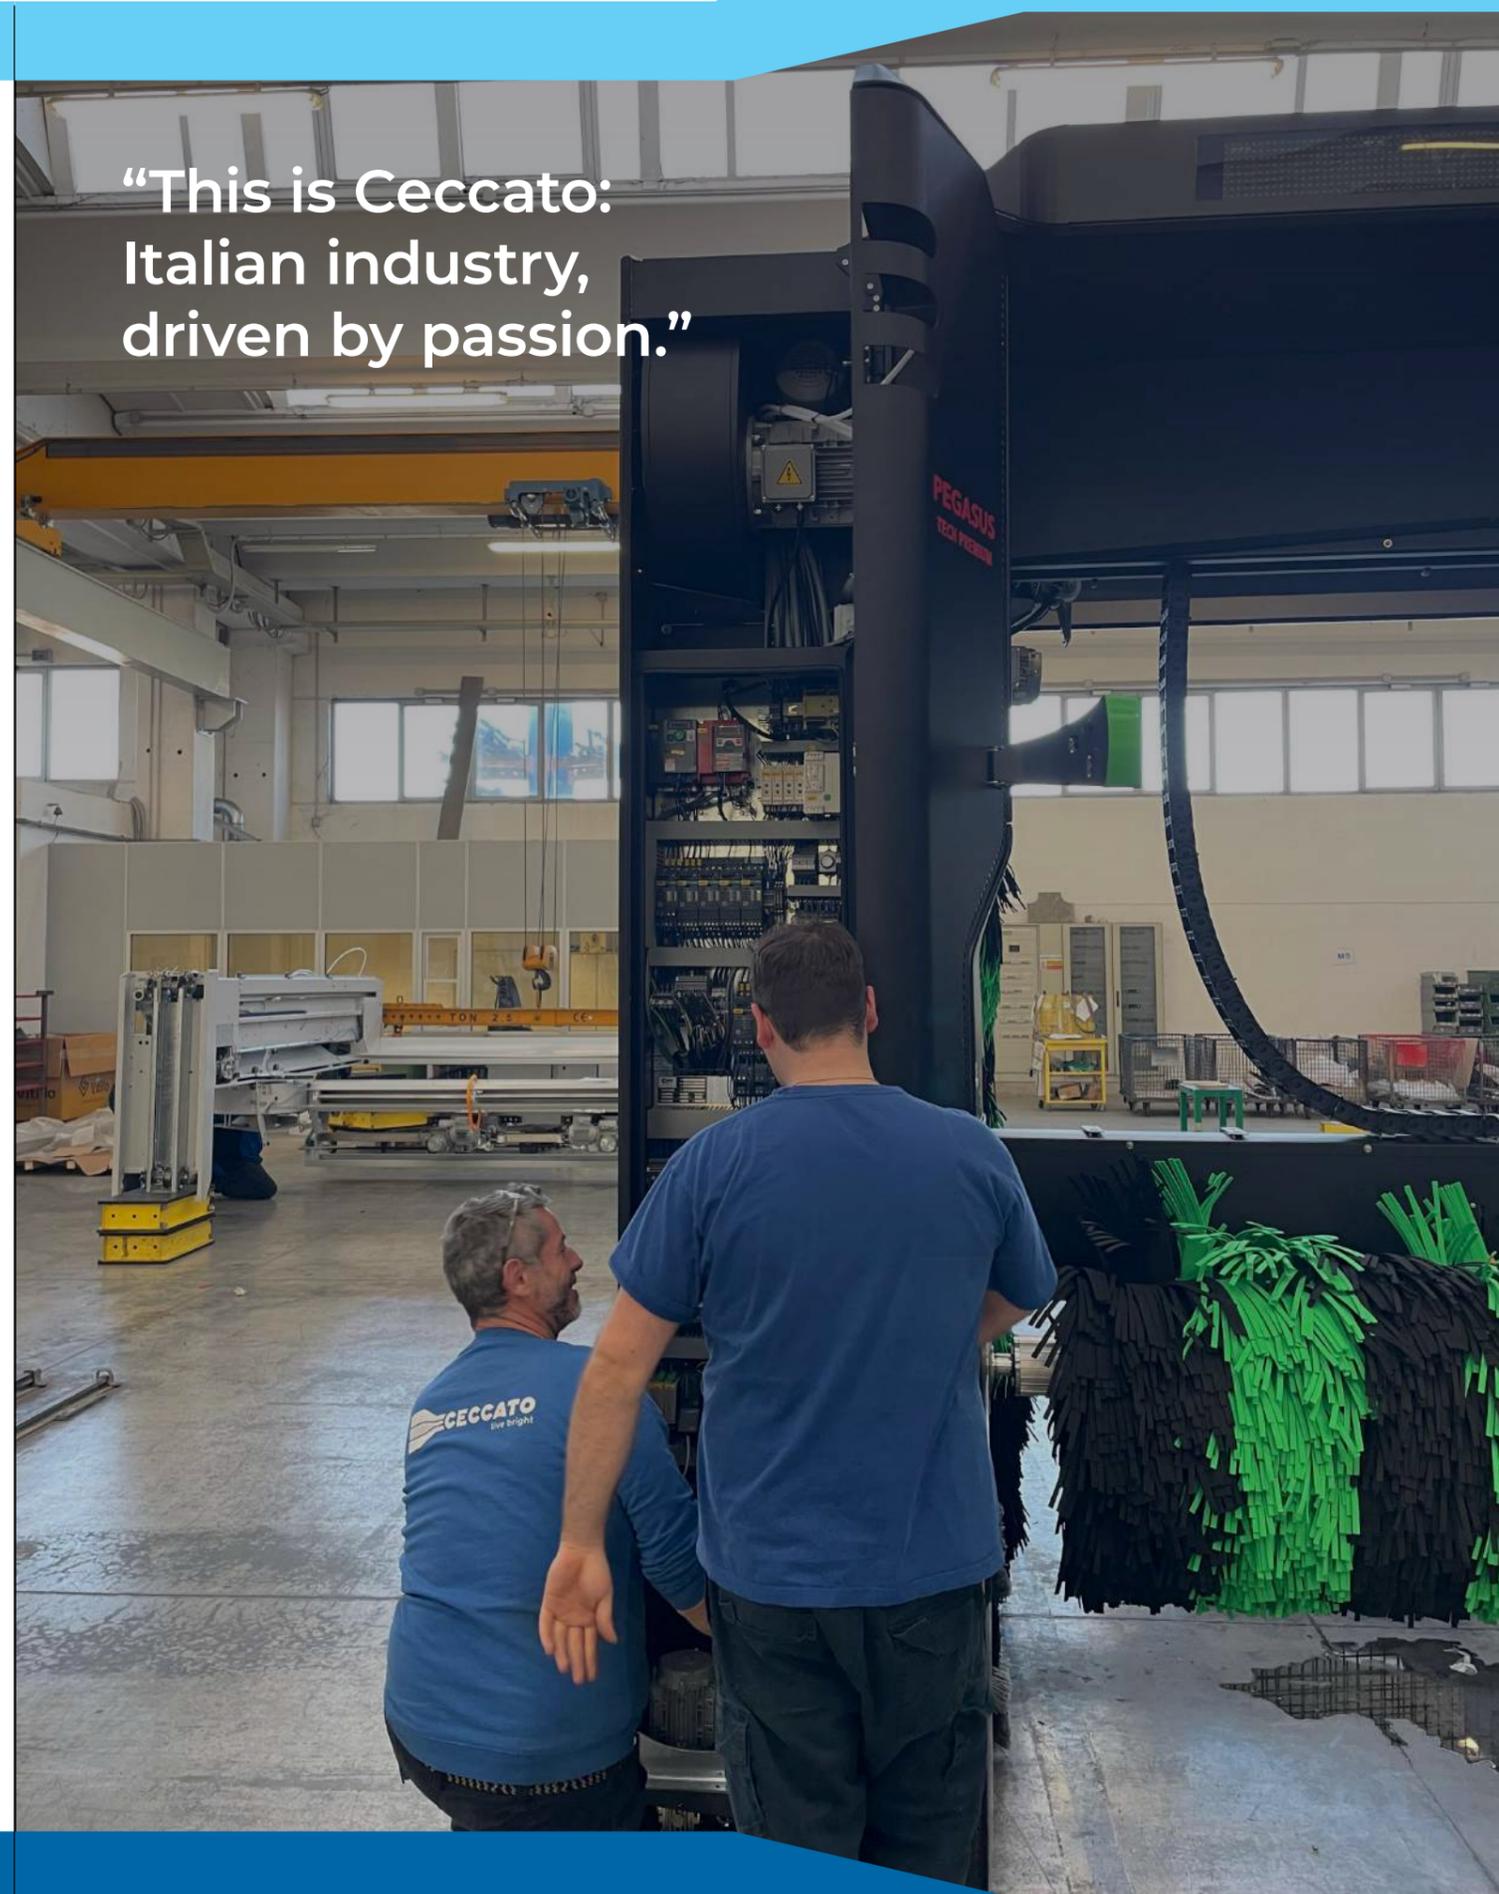

Our Made in Italy is not just an origin: it's a choice of quality, precision, and pride.

Behind every machine is the knowledge of those who have worked with passion for years. An integrated, controlled production process focused on excellence. We believe true innovation comes from the combination of industrial technology and artisanal skills.

“This is Ceccato:
Italian industry,
driven by passion.”
